

TravelMate: An application to help you plan your Next Trip

- By KULDIP SAHNI

INTRODUCTION

Being an avid traveler, I always find planning the itinerary of any trip the most confusing & time-consuming part.

Every-time I decide to go on a trip, I end up in spending a considerable amount of time in deciding the following things –

- 1) where to stay
- 2) what all places to visit
- 3) where to eat
- 4) where to go for shopping etc.

Although the answer to these questions vary from person to person, each person having their own taste and likings, but still it will be of great help for every traveler if he/she gets a curated list of options based on recommendations & recent popularity.

By having such suggestions, anyone who is planning to explore a new place will save tremendous amount of time & energy and will be able to enjoy the entire process of planning & traveling more. In this project, I address this problem and will try my best to come up with a good solution, if not the best.
